Project Name

Used to identify your Project on the Dashboard, Vercel CLI, and in the URL of your Deployments.

vercel.com/…eitas-datas-projects/   stock720x

Learn more about Project Name ↗   Save

Project ID

Used when interacting with the Vercel API.

prj_1tER4Stavwh1GlPXtfobVxcn4cUc   ⧉

Learn more about Project ID ↗

Vercel Toolbar

Enable the Vercel Toolbar on your Deployments.

Pre-Production Deployments
Default (controlled at the team level) ⌄

Production Deployments
Default (controlled at the team level) ⌄

ⓘ To use the toolbar in production your team members need the **Chrome extension** or to enable the toolbar for that domain in the toolbar menu. Learn more about using the **toolbar in production**.

Learn more about the Vercel Toolbar ↗   Save

Preview Deployment Suffix

By default, the URL of every new Preview Deployment ends with `.vercel.app`. This setting allows you to choose your own custom domain in place of this suffix. This takes precedence over the team-level preview deployment suffix.

my-deployment.   vercel.app

This feature is available on the Pro plan ↗ for an additional **$100 per month**.   Upgrade

Transfer

Transfer your project to another team without downtime or workflow interruptions.

Learn more about Transferring Projects ↗   Transfer

Delete Project

Permanently delete this project and all deployments, domains, environment variables, serverless functions, and settings.
